

Reflection About Seminar Tasks

Object-Oriented Design, IV1350

Questions

What are your conclusions about this seminar? Try to answer the following questions. •

Approximately how much time, including lectures and exercises, have you spent preparing for the seminar?

- What have you learned from the problems presented?

Confident exception handling.

- What was difficult and what was easy?

Testing exceptions was easy, implementing an observer pattern was more difficult.

- How have you worked when solving the problems?

Much discussion and web searches.

- What questions remain regarding the problems? • Do you have any suggestions regarding the course? Both suggestions for this course instance and for coming years are of interest.
